

Team HAARP

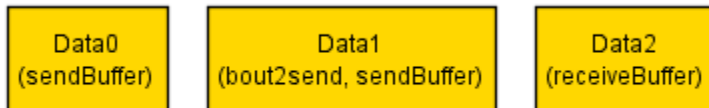

Jim Gildersleeve

RJ DeCramer

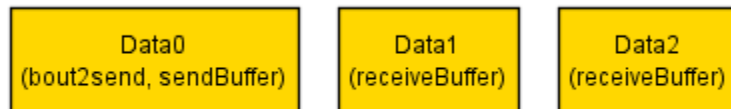

All data begins in the sendBuffer, with one of them marked as about to be sent

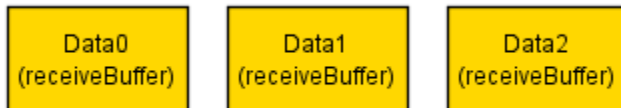

First data is sent to the receive buffer and next data is marked to be sent next

Second data is sent

All data is now sent and in the receive buffer

There was no way for us to fail at transmitting the data

2 commands were executed. The results are:

#1: **Instance found.** CanTransmit is consistent.

#2: No instance found. CannotTransmit may be inconsistent.
